SÉBASTIEN CABANA

COMPUTER ENGINEERING
STUDENT

(514) 883-8805 | sebastien.cabana@uqtr.ca | Trois-Rivières

- **Takes initiative with confidence:** Proactive and independent, I anticipate needs and transform challenges into opportunities through quick and effective action.
- **Positive leader:** I inspire and motivate teams by fostering collaboration and guiding everyone towards achieving common goals.
- **Creative and innovative:** I propose innovative and original solutions thanks to my ability to think differently and explore new approaches.
- **That's why I am the right person for you!**

EDUCATION

Bachelor's Degree | In progress
Computer Engineering
Université du Québec à Trois-Rivières

College Diploma (DEC) | 2023
Computer Science and Mathematics
Cégep de Saint-Jérôme

PROFESSIONAL EXPERIENCE

Research Assistant | 2025 - Present
Université du Québec à Trois-Rivières, Trois-Rivières

- Writing technical guides and producing educational video tutorials for the use of devices and software in electrical engineering.
- Design of a complex analog printed circuit board as a demonstrator for students.
- Project management and prioritization in a research and development environment.

INVOLVEMENT

President | 2025-2026
IEEE St-Maurice Section Student Branch

Co-Vice-President | 2025-2026
Machine Competition of the Engineering Games

Director of Technology | 2025-2026
Organizing Committee for the Conference on Sustainability in Engineering

Head of Delegation | 2024-2026
CS Games

Treasurer | 2024-2025
IEEE St-Maurice Section Student Branch

SKILLS

Languages
C/C++, C#, CUDA, LADDER, Shell, VBA, VHDL

Tools and Software
Altium Designer, Git, MATLAB, RSLogix 500, SolidWorks, STM32Cube IDE, Vivado

NOTABLE PROJECTS

Machine Competition of the Engineering Games
Robotics Design | 2024 to 2026

- Development of skills in mechanical, electrical, and embedded software engineering
- Project management and coordination of a multidisciplinary team
- Integration of numerous actuators, sensors, boards, and embedded power supplies

Custom Electronic Accessory
Entrepreneurial Project | 2025

- Executing a complete project from initial concept to final commercialization

Analog Audio Amplifier Circuit
Electrical Engineering Internship | 2025

Boolean Equation Simplification Algorithm in C
Academic Project | 2024

- Original algorithm development based on Karnaugh maps

Implementation of an Adaptive Cruise Control on an Electric Scooter
College Final Year Project | 2023

- Reverse engineering of an electronic system
- PID control and embedded real-time processing

AWARDS AND HONORS

Highest GPA in the Program | 2023-2025
Université du Québec à Trois-Rivières

"Stars du Réseau de la santé" Award | 2024
Development of a software tool for Santé Québec

Highest GPA in the Program | 2019-2023
Cégep de Saint-Jérôme

Governor General's Academic Medal | 2019
